

WARDENS PEER INTERACTION PROGRAM

We started out as strangers however, we quickly became a team of highly effective and passionate change leader within the corrections industry. We achieved this by being receptive, adapting and realigning our approach to the commonly faced issues that affect corrections today.

— Dan Keen

Director of Corrections, St. Charles County DOC, Missouri

I have NEVER bonded with a group of peers the way I did with the individuals in this group. This experience was a rebirth. As I learn, develop myself and attend training, I bring everything I have to offer back to others.

— Angela Chevalier

Senior Warden II, Ellis Unit, Texas

Program - \$675

Fee covers training materials, meals, and refreshment breaks

Prison Tours

Program includes tours of state prison facilities

Resources

A View from the Trenches: A Manual for Wardens by Wardens

Program includes a one-year membership in NAAWS

Network • Explore • Identify • Discuss • Prepare

Upcoming Sessions

October 2-6, 2023

Huntsville, Texas

Facilitators

Patricia Caruso, Todd Ishee, David Glaser, and Doug Dretke

In an exciting collaboration, the Correctional Management Institute of Texas (CMIT) at Sam Houston State University and the North American Association of Wardens and Superintendents (NAAWS) are hosting the very popular Wardens Peer Interaction Program.

The program is designed for Wardens and Superintendents, including Deputies, and Assistant Wardens. Agencies are encouraged to send participants in teams of two; with 36 participants being accepted into each program.

The program provides a forum for Wardens to network with peers. Topics of discussion include prison and jail: current management, operations, programs, best practices, and strategies for handling critical correctional challenges.

Past facilitators include Patricia Caruso, Harold Clarke, Harley Lappin, Gary Mohr, and Richard Stalder.

Only 36 participants are accepted.
